The patents and applications that correspond to the rights transferred by this Assignment are:

Inventors: Emily A. Carter and Emily A. Jarvis.

This transfer is conditioned on the following terms:

1. **Licensing** Princeton will diligently seek to license the Patent Rights, and will administer any resulting license agreement for the mutual benefit of the parties to this Agreement and in the public interest. Princeton will have sole authority over all terms in any such license agreement, but will request to have any licensee reimburse The Regents for costs of patent prosecution and maintenance costs incurred prior to this assignment, which total \$23,885.47. Once a licensee is located, Princeton shall share ten percent (10%) of revenue from the licensing of the Patent Rights with the Regents, payable quarterly.
2. **Indemnification** Princeton's Licensee must indemnify, hold harmless and defend The Regents, its officers, employees, and agents, the sponsors of the research that led to the invention, the inventors of the patents and patent applications in Patent Rights and their respective employers from and against any and all liability, claims, suits, losses, damages, costs, fees and expenses arising out of exercise of any license or any sublicense.

Princeton's Licensee, at its sole cost and expense, must insure its activities in connection with the work under a future license to Patent Rights and obtain, keep in force and maintain Comprehensive or Commercial Form General Liability Insurance (contractual liability included) with limits as follows:

(a) Each occurrence	\$2,000,000.
(b) Products/completed operations aggregate	\$2,000,000.
(c) Personal and advertising injury	\$2,000,000.
(d) General aggregate (commercial form only)	\$2,000,000.

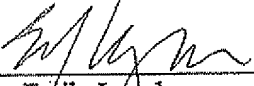

In the event that Licensee's industry standard limits are lower, Princeton may approach The Regents to discuss modifying these limits.

3. Reservation of Rights The Regents expressly reserves the right to use the Patent Rights and associated technology for educational, research and non-commercial clinical purposes, including sharing tangible research results with other non-profit institutions for their use of similar scope.

4. Sponsorship Obligations The parties agree that with the assignment of patent rights, Princeton also accepts transfer of future sponsorship obligations on each of the subject inventions and agrees to be bound by and comply with such obligations. Although Princeton may license the Patent Rights within its discretion, Princeton will not assign its rights to another entity.

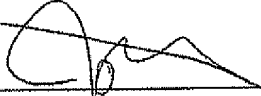

5. Disclaimers This agreement does not confer by implication, estoppel, or otherwise any license or rights under any patents of The Regents other than the Patent Rights as defined herein, regardless of whether those patents are dominant or subordinate to the Patent Rights, or any right to use in advertising, publicity, or other promotional activities any name, trademark, or other designation of The Regents.
